

TEST PRINT –
BLACK & COLOUR

Print Test
Print Test
Print Test

Streaky prints: Press the cartridge onto a pad of moist tissue that is resting on something you don't mind getting inky. Hold for about 30 seconds. Don't wipe clean.

Fuzzy prints: Remove & reinstall cartridges. If available, run the page alignment utility.

Poor colours: If the colours look wrong run two test print pages to clear any contamination.

If these measures don't fix the problem, keep the test prints and call us as soon as possible!

NOTE:
Screen colours may differ
from printed colours!
